

EZStreet

WEB-BASED TIMESHEET, EXPENSE REPORT, BILLING AND INVOICING

Your billed time is your marketed product. Your unbilled time is probably your firm's greatest operating cost.

With EZStreet, the data collected regarding where employees spend their time is the most valuable asset any professional services firm can acquire. This will guide your every move, from increasing fees on future projects to identifying unprofitable clients to changing your service mix.

EZStreet has many flexible features making it the perfect business management tool for service-oriented businesses of any size. It provides precise time and expense tracking thanks to its built-in stopwatch timer. EZStreet reporting is designed to help you manage your business more profitably.

EZStreet is perfect for consultants, accountants, lawyers, graphic designers, architects and anyone who needs to track their time and bill for it.

Timesheets

Real-time online timesheet management and reporting. Track time against clients and projects using stop-watches or update your timesheet whenever it's convenient.

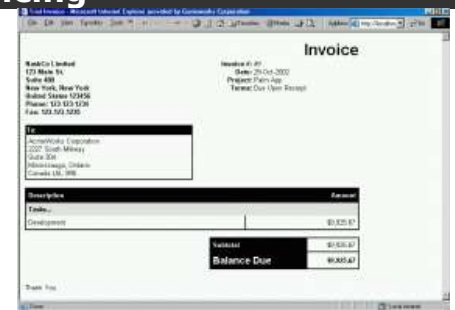

Expense Reports

Standardized expense reports for accounting and reimbursement. Expense items can be assigned directly to projects and automatically included onto client invoices.

Invoicing

With just a few clicks, you can automatically generate project invoices, make adjustments to meet client expectations, and then print and issue them.

Project Management

EZStreet project management is based on automating time and expense tracking. It's easy - no guesswork, just the facts.
